

Bank Manager and Tax Manager

The OneOffice Bank Manager controls all payments or receipts of money for a company and provides facilities for the reconciliation of such transactions against the bank statement. The OneOffice Tax Manager is a centralised management system for the control and preparation of returns for appropriate indirect taxation systems.

Key Features at a Glance

- Supports any number of bank accounts
- Manages Petty Cash
- Multi-currency BACS transfers
- Prepares indirect tax return (e.g. UK- VAT)
- Comprehensive audit reporting

Benefits

- Automatic reconciliation of bank statements saves time expended on manual reconciliation
- Saves cost of manual tracking and management of banking and tax
- etc

BANK MANAGER

Any number of bank accounts may be maintained by the company and automatic reconciliation against the bank statement file is available with systems such as Royline, Banklink, etc. In addition the system caters for petty cash account maintenance and payments by cheque, credit transfer and BACS in multi-currencies. The Bank sub-system integrates with General Ledger, Contract Costing, Sales Ledger, Purchase Ledger and Payroll.
